DEPARTMENT OF SUSTAINABLE LAND MANAGEMENT

ENVIRONMENTAL MANAGEMENT AND SUSTAINABILITY

Equipping you to understand and manage
human interactions with the environment and
help to create a sustainable future for us all

ENVIRONMENTAL MANAGEMENT AND SUSTAINABILITY AT READING

How we manage the environments in which we live, work and relax is one of the biggest and most exciting challenges the population currently faces. Our land and water bodies are at the centre of increasing conflict over their management, with demands for multi-purpose use such as food production, the provision of renewable energy, conservation of biodiversity, urban development and the provision of space for recreation and tourism.

Our BSc Environmental Management and Sustainability programme gives you a sound understanding of the functioning of natural and man-made environments, covering the acquisition and analysis of environmental data, the development of management strategies and plans, and the implementation of appropriate management methods; helping you to develop a comprehensive range of skills that will enhance your employability.

WHY READING?

At Reading, you will be part of a School that is regularly ranked highly in the league tables and is internationally recognised for its research expertise. When transferred to a teaching environment, this will enable you to develop excellent research skills that are highly regarded by employers.

Our modern facilities are located on an award winning parkland campus, creating a ready-made fieldwork environment which complements the School's own research facilities located on our nearby farms – part of which is an 18ha restored floodplain meadow on the banks of the river Loddon, open to the public.

The School has excellent links with employers, working closely with a wide variety of organisations to ensure that you acquire hands-on experience across the industry with field trips and visits that enable you to apply your theoretical knowledge as you develop. Previous students have undertaken placement years with the Wildfowl and Wetlands Trust and Kew Gardens. You can apply for one of the many advertised placement years in the UK or abroad, or you can develop your own tailor-made placement.

Many of our courses are taught in small groups and involve lots of practical application, that is supported by a wide variety of optional modules enabling you to specialise in the areas that interest you the most. This is achieved by tapping into the wealth of expertise that is held across the University, as we link with other disciplines such as: Biology, Geography and Environmental Science.

BREADTH AND DEPTH

Our degree is built on a number of core modules covering topics such as:

- Global sustainability
- International development
- Ecology and environmental management
- Tools for environmental management and sustainability
- Transitions to Sustainability.

A variety of optional modules also allow you to follow your own interests, covering topics such as:

- Ecosystem services and nature-based solutions
- Climate and environmental change
- Consumption, politics and space
- Business and marketing.

For a complete module list, visit:

reading.ac.uk/bsc-environmental-management

YOUR CAREER ASPIRATIONS

This programme is an excellent preparation for a range of careers as it is sufficiently flexible to allow you to become a generalist working at the level of an individual site or a specialist at a regional, national or international scale.

Our graduates typically find employment within environmental management, sustainability, nature conservation and natural resource and management roles in the UK and internationally. Many have gone to work for governmental organisations such as Natural England, Environment Agency, Wildlife Trusts, the National Trust, local authorities and environmental or sustainability consultancy in the private sector.

'I have really enjoyed the field trips, group projects, and meeting new people from all over the world. Department staff are always there to support you in every step you take. The different module options are particularly good as they give you wider knowledge on specific topics; crucial for your learning and future career.'

Mari Georgiou, Current student

The Department of Sustainable Land Management, based within the School of Agriculture, Policy and Development, is committed to empowering change through our teaching and research, with our academics working to tackle some of the world's most pressing issues.

Our mission is to make a difference in the context of the United Nations Sustainable Development Goals, so we offer a diverse range of modules giving you knowledge and skills that will enable you as an individual to have an impact and be part of global change, whatever your chosen pathway.

Important Information

This brochure was issued in 2023 and is aimed at prospective undergraduate students wishing to apply for a place at the University of Reading (the University) and start a course in autumn 2024. The University makes every effort to ensure that the information provided in the brochure is accurate and up-to-date at the time of going to press (May 2023). However, it may be necessary for the University to make some changes to the information presented in the brochure following publication – for example, where it is necessary to reflect changes in practice or theory in an academic subject as a result of emerging research; or if an accrediting body requires certain course content to be added or removed. To make an informed and up-to-date decision, we recommend that you check reading.ac.uk/study

The University undertakes to take all reasonable steps to provide the services (including the courses) described in this brochure. It does not, however, guarantee the provision of such services. Should industrial action or circumstances beyond the control of the University interfere with its ability to provide the services, the University undertakes to use all reasonable steps to minimise any disruption to the services.

Topics

Topics are provided as a taster of the areas of study that may be available on each course. Information is correct at the time of going to press (May 2023), for a list of compulsory (core) modules please check reading.ac.uk for the most up to date information.

Year abroad and placement fees

Some courses include an optional or compulsory year abroad or placement year. During this year you will only pay a partial fee which is currently set at 15% of the normal tuition fee. Check the website for the latest information: reading.ac.uk/fees-and-funding

Placements

Programmes with a Professional Placement Year (also known as 'Year in Industry' or 'Placement Year') are fully dependent on students securing their own placement opportunity, normally through a competitive recruitment process. The University provides dedicated career and application support for placement year students. Students who do not secure a placement or who are unable to complete the placement year due to extenuating circumstances, have the option to transfer to a three year variant of their programme with agreement from their School/Department.

Study abroad

The partnerships listed are correct at the time of publication (May 2023). For up to date information on the University's partnerships contact studyabroad@reading.ac.uk

Where Study Abroad is not a compulsory part of the degree programme, the University of Reading cannot guarantee that every applicant who applies for the scheme will be successful. Whilst efforts are made to secure sufficient places at partner institutions, the number of places available and the University's partners can vary year-on-year. In all cases, the University cannot guarantee that it will be possible for applicants to choose to study abroad at a particular institution.

Further, certain courses and/or institutions may require you to satisfy specific eligibility criteria. It can be a competitive process. For further information on the University's Study Abroad Scheme please contact studyabroad@reading.ac.uk
